

# Consent Form – RMD Structural Remodeling System

The RMD Structural remodeling System is a revolutionary skin rejuvenation treatment that plumps and tightens the skin and the muscles, while smoothes the wrinkles.

The RMD Structural remodeling System use a new approach to maximize facial rejuvenation by non-invasive ways, respecting the physiology and biology of the skin and muscles.

Results will occur gradually during the treatment series, an average of 6 to 12 treatments are needed. The number may vary depending upon the severity of the problem. \_\_\_\_\_

Some illnesses or conditions such as pregnancy or wearing a "pacemaker" are considered contraindications to the treatment. Advise the technician of any medications that you are taking and detail your medical history (fill the Client Form). I do not have any contraindication listed below: \_\_\_\_\_

- Pacemaker or other metallic or electric device.
- Metallic implant around the treatment area.
- Recent dental procedure or invasive treatment around the treatment area (last 3 months).
- Medical conditions: diabetes, epilepsy, cancer, heart or blood diseases (thrombosis, ischemia, embolism), on anticoagulant medication, auto-immune diseases (HIV, AIDS, etc.), on immunosuppressant medication, paralysis or pain around areas to be treated.
- Skin conditions: inflammation (e.g., dermatitis), areas where there are severe acne infections or very dry and fragile skin.
- Allergies: latex, chrome or nickel (reaction test required prior to treatment).
- Facial injections for wrinkles (wait 3 months after injection).
- Pregnancy.

Technologies used during RMD treatments are safe. However, certain minor and temporary reactions may occur, such as redness, tingling, muscle spasms (sudden contractions), metallic taste, tapping filling in the gums or teeth but these reactions will disappear within 24 hours following the treatment. Sometimes, in cases with very sensitive skin, reactions might last a little longer but they will disappear. \_\_\_\_\_

The result of any treatment depends upon the individual skin metabolism of each person. It is important to understand that the speed at which results are achieved as well as the final outcome can never be exactly predicted. The number of treatment sessions that will be needed will be estimated approximately and may change during the course of the treatment series. \_\_\_\_\_

It is important that you attend your scheduled appointments regularly in order to obtain the best possible results.

There is no guarantee that the achieved results will match the results that are desired.

Skin aging is a natural process that cannot be stopped, although it may be slowed down. It is therefore strongly recommended to follow a maintenance program in order to maintain results. \_\_\_\_\_

I have read all the above explanations and recommendations regarding RMD Structural Remodeling System treatments. I understand the advantages and the limitations of the treatment. I agree to follow the recommendations given to me by my therapist or aesthetician in order to achieve the best possible results. I understand that there are no guaranteed results and that maintenance is necessary.
